**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

1) Responsive to communication(s) filed on 01 October 2004.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of Group I, claims 1 – 4 in the reply filed on March 3, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Shinichi (JP Pub. 2000-114367).

Regarding claim 1, Shinichi teaches a semiconductor device comprising:  
an organic insulating film (11) having an opening (Para. 0014),

wherein said organic insulating film has a modified portion facing (Para. 0014)  
said opening, and  
said modified portion includes nitrogen atoms (Para. 0014).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all  
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2 – 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shinichi (JP Pub. 2000-114367) in view of Ellingboe et al (U.S. Pat. 6,114,250).

Regarding claim 2, Shinichi fails to teach wherein said modified portion further comprises fluorine atoms, and a concentration of said fluorine atoms in said modified

Art Unit: 2818

portion is lower than a concentration of said nitrogen atoms. Ellingboe discloses that it is known in the art that fluorine is provided in the modified portion and is lower than the concentration of nitrogen (Col. 1, Lines 57 – 67). It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the etching means that is disclosed in Ellingboe's invention, so that fluorocarbons are added in order to control the form of the film (Col. 1 Lines 57 – 67 and Col. 2, Lines 44 – 54).

Regarding claim 3, Shinichi teaches further comprising:

a metal conductor whose main component is copper (15), formed in said opening (Para. 0013).

Regarding claim 4, Shinichi wherein said metal conductor is in direct contact with said modified portion (Para. 0013 – 0017).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
